ABSTRACT

An adjustable wreath hanger, preferably made of molded plastic, is disclosed herein that preferably comprises a hanger strip attachable to the top of a door or other object and a hook strip that slidably engages the hanger strip to permit selective variation of the distance between a rearwardly facing door hook and a forwardly facing wreath hook. The hanger strip preferably comprises a plurality of forwardly facing detent members into which a tooth projecting rearwardly from an engagement tab on the hook strip can be selectively engaged or disengaged to vary the relative positions of the two strips, thereby effectively elongating the length of the wreath hanger.
